

Saving Money & Investing in Your Future

By Jayden Cobb

What did
you learn
about saving
your money?

I learned that saving your money can benefit you in the future. From paying college tuition to paying bills or just for a rainy day. Saving your money can overall pave the way for your future.

What did you
learn about
investing in
your future?

I learned that investing your money is a great way to build wealth. If you have a share of a few stocks, it can really get you money.

How much do
you need to
save and for
what reason?

You always want to save a reasonable amount. I would say save no more than 20% of your money.

What's your plan for saving the money and how long will it take to reach your saving goal?

It depends on my income. Let's say by the time I'm 30 I'm a millionaire, I plan on saving about 10% of my money.

Do you plan on investing, if yes, in which stock and why?

I want to invest in as many shares as I can. The more that I invest the more money I will have.

How long do you
want to invest
your money and
why?

Until the day I die. I will
teach my kids, then
they'll teach their kids
and so on. It's time for us
as a community to gain
and maintain wealth.
